## MODEL

ART 01 - FALCON EYE  
Limited edition at 12 pieces

## REFERENCE

MK4 AU

## CASE

Material: Yellow gold 3N  
Hand satin finish

## SAPPHIRE

Main sapphire crystal:  
Curved surface, double 17-degrees  
chamfer, hemispherical inner cut  
(anti-reflective treatment)

Caseback sapphire crystal:  
Flat surface with lateral chamfers  
(anti-reflective treatment)

Hardness: 2300 Vickers

**DIAL**

Material: Falcon's eye stone marquetry on a brass base

**MOVEMENT**

Caliber: In-house A01 automatic winding

Dimensions: 37.5mm (L) x 33.15mm (H)

Thickness: 4.04mm (including weight)

Mass: 18.4g

Base plate: Grade 5 Titanium  
(PVD treatment)

Bridges: 3N yellow gold-plated with  
diamond-cut angle

Modules: Grade 5 Titanium with two-plane  
satin finish (PVD treatment)

## **MOVEMENT**

(suite)

Mass: Reconit®18 with engraving and rhodium plating

Number of jewels: 32

Frequency: 4Hz

«Back in time» seconds hand:  
running in reverse

Power reserve: 48 hours

## **BRACELET**

Nubuck calf leather

## **WATER RESISTANCE**

ALTO deployant clasp in yellow gold 3N

5ATM

## **WEIGHT**

88g

RESISTANCE

## THE DISTINCTIVE FEATURES OF THE MICRO-ROTOR

The ART 01 watch you own is equipped with a movement featuring a micro-rotor. This technical component is distinguished by its dimensions, shape, and position: it is a dense and compact half-disc made of tungsten, integrated into the upper part of the movement. The micro-rotor embodies a wealth of expertise and innovation. It provides the movement with automatic winding capability without compromising its aesthetic appeal and refinement. Indeed, this mechanism offers a clear view of all the gears in the movement.

The use of the micro-rotor also helps reduce the overall thickness of the movement, allowing the A01 caliber to achieve an exceptionally slim profile of just 4.04 mm.

## **SETTING THE TIME**

Pull the crown outwards.

Turn the crown in either direction to set the hour and minute hands to the correct time you desire.

Push the crown back inwards.

## **MAINTENANCE**

Due to the highly sophisticated mechanism of the ALTO ART 01, it is advisable to have your watch serviced by our authorized ALTO service center approximately every 3 years for regular maintenance, and every 5 to 7 years for a complete overhaul.

## **WATER RESISTANCE**

The ART 01 is designed to be water-resistant up to 5 bar/ATM. It's important to note that a strong shower stream or faucet can easily exceed the 5 bar pressure limit, compromising the watch's water resistance. To ensure water resistance, always ensure the crown is fully pushed in against the case. We strongly recommend avoiding wearing your watch during any water-related activities and keeping it away from water.

Please note that any improper use of the watch is not covered by the warranty. If condensation appears under the watch glass, it indicates a malfunction in the sealing system, and it's recommended to contact our service center for inspection and potential repairs.

## MAGNETISM

Exposing your watch near electronic devices that emit magnetic fields can disrupt its proper functioning. These magnetic fields are produced by various sources such as mobile phones, computers, refrigerators, and other electronic devices. They can cause sudden accuracy issues with your watch. While watches are designed to withstand typical everyday radiation, significant magnetic disturbances can magnetize certain steel components of the movement, especially the balance spring.

In such cases, it is recommended to contact our service center where a specialized watchmaker can examine your watch and perform demagnetization if necessary.

## VIBRATIONS

Avoid exposing your watch to vibrations and shocks from activities such as golf, tennis, mountain biking, or any sudden impacts. These shocks can damage not only the external parts of the watch but also compromise the accuracy of its movement. Any damage resulting from improper use of the watch is not covered by the warranty.
